ABSTRACTED-PUB-NO: NL 1005509C

BASIC-ABSTRACT: The device is used to pull on the release mechanism of a king pin bearing. The king pin bearing links a road trailer to a tractor unit. The remote end of the tool has a chain (10) which is anchored to the trailer part of the junction. The tool has a spring loaded shackle which is used to grasp the release handle of the king pin coupling.

The locking bar (7) of the shackle is operated by a handle grip (9) at the outer end (4) of the tool, via a Bowden cable (5). The handle end of the rigid tool also has an illuminating unit (11), powered by batteries.

ADVANTAGE - ADVANTAGE - Makes operation of locking device easier for operator.
